Uploaded the report in slack			YES		

Certification Course Details: (Attach the snapshot and briefly write the report for the same)

The screenshot displays the Coursera interface for a quiz titled "Algorithms & Techniques - Week 3". The quiz is part of the "Blockchain Basics" course, specifically under the "Week 3 Evaluation: Algorithms & Techniques" section. The quiz duration is 30 minutes, and the user has achieved a perfect score of 100%. The interface includes a sidebar with course navigation options such as "Public-Key Cryptography", "Hashing", "Transaction Integrity", and "Securing Blockchain". The main content area shows the quiz title, a "Review Key Concepts" link, and a "Submit your assignment" button. The grade section indicates a 100% score with a "View Feedback" button. The bottom of the page shows the Windows taskbar with the date and time as 17:33 on 05-06-2020.

The course I have chosen during the lockdown period is Blockchain basics. Since I had previously knew few topics about bitcoin I am continuing this course. Since Blockchain is gaining a lot interest in the IT Sector I have preferred to choose this course.

Coding Challenges Details: (Attach the snapshot and briefly write the report for the following)

The screenshot shows a GitHub repository page for the file `3IntegersSum_5thJune.java`. The code is as follows:

```
1 // write a java program to read three integer values from the keyboard and find the sum of the values. Declare a variable "sum" of type int
2
3 import java.util.Scanner;
4 public class Exercise12 {
5     public static void main(String[] args)
6     {
7         int i,n=0,s=0;
8         double avg;
9         {
10            System.out.println("Input the 5 numbers : ");
11        }
12        for (i=0;i<5;i++)
13        {
14            Scanner in = new Scanner(System.in);
15            n = in.nextInt();
16            s +=n;
17        }
18        avg=s/5;
19        System.out.println("The sum of 5 no is : " +s+"\n\nThe Average is : " +avg);
20    }
21 }
```

The question I took to code is:

Write a java program to read three integer values from the keyboard and find the sum of the values. Declare a variable "sum" of type int and store the result in it

Solution: The above snapshot is the code which I have uploaded in my Github repository
